Intern - Python / Frappe / ERPNext Developer

Location: Tiruppur, Tamil Nadu (On-site) | **Type:** Full-time Internship, leading to a permanent role

About Aerele (aerele.in)

Aerele is a ~40-person engineering team based in Tiruppur, Tamil Nadu, focused on the Frappe framework and ERPNext. The team is an active contributor to the open source core Frappe and ERPNext repositories and works with Frappe partners across India, the Middle East, Europe, and Africa. Aerele is currently expanding into building its own open-source tools and AI-driven products (eg., lens.aerele.in).

The Role

This is a full-time internship for final-year college students (B.E. / B.Tech / BCA / MCA or equivalent), starting immediately and continuing until final semester results are declared.

The work involves Python development within the Frappe ecosystem:

- Contributing to open-source repositories.
- Working on Aerele's products.
- Learning how production-grade business software is built.

Most of the contributions are public and visible on GitHub.

Who Should Apply

Final-year students with an interest in Python and open-source software. Prior experience with Frappe or ERPNext is not expected.

Required Skills:

- Working knowledge of Python
- Basic understanding of HTML, JavaScript, and REST APIs
- Familiarity with SQL and Git
- Ability to read documentation and figure things out independently

Good to have:

- Familiarity with the Frappe framework, MariaDB, Linux command line, or a GitHub profile with personal projects.

Stipend Structure

Phase	Duration	Monthly Stipend
Phase 1	First 4 months	Rs. 8,000
Phase 2	Next 4 months	Rs. 10,000
Phase 3	Next 4 months or until conversion (whichever is earlier)	Rs. 12,000

After Graduation - Full-Time Roles

On successful completion of the internship and graduation, the role converts to a permanent position:

Level	Annual CTC	Typical Profile
Junior Developer - I	Rs. 4,00,000 - 5,50,000	Handles tasks independently, writes reliable code
Junior Developer - II	Rs. 5,50,000 - 7,00,000	Owens modules, guides peers, and contributes to design decisions
The stated CTC covers the annual bonus, Provident Fund (PF), and all required statutory contributions.		

Hiring Process

- **Round 1 - Programming round:** A Python-based coding test to assess problem-solving ability and programming fundamentals.
- **Round 2 - Technical interview:** A face-to-face discussion covering programming concepts, system architecture, and general technical thinking.
- **Round 3 - Culture fit:** A conversation around work style, values, and how well the candidate fits into the team's way of working.
